

ECONOMICS

Program Description

Why Study Economics?

Economics is the foundation for understanding how businesses, governments, and individuals make decisions. It plays a crucial role in accounting, finance, and markets around the world. As interactions between consumers, businesses, and policymakers evolve, economic principles become even more important.

The Economics Program Advantage

Our program equips you with the skills to think critically and analyze problems logically. You'll develop strong quantitative reasoning abilities through communication, practical exercises, and exposure to economic literature and business practices. These skills are essential for success in both academics and your future career.

What You'll Learn

The curriculum covers a wide range of economic topics, including macroeconomics (focusing on large-scale economies), microeconomics (focusing on individual markets and decision-making), and environmental economics (considering the economic impact of environmental issues). You'll also explore how these economic principles connect to politics, history, business practices, and global trends.

Career Opportunities

An Economics degree opens doors to a variety of exciting careers across different industries. The strong analytical and problem-solving skills you develop are highly sought after by employers worldwide.

Economics Pathways

The program is designed for students pursuing either a four-year college degree or a career in business. Transfer students can earn an Associate degree specifically designed to meet the requirements of various transfer institutions.

Boost Your Employability

Regardless of your chosen field, an Economics degree gives you a significant advantage in the job market. Economics graduates are highly numerate and possess valuable transferable skills, making them well-positioned for diverse and rewarding careers.

Transfer Preparation

MSJC offers a wide range of course work that prepares students for the workforce or for transfer to four-year colleges and universities. All four-year institutions prescribe their own standards for course evaluation and admissions. Courses that fulfill major requirements for an associate

degree in a program at MSJC might not be the same as those required for transfer into a similar major at a four-year university. Please meet with a Counselor to confirm transfer requirements.

Transfer students are advised to do research on prospective majors and careers. The MSJC Transfer Center and MSJC catalog can be helpful tools. Students interested in transferring to CSU's or UC's can access major preparation by visiting ASSIST (<http://www.assist.org>). All students are advised to meet with a counselor at least once a semester to create or update their comprehensive education plan.
